TextCritical.net - Feature #2832

Feature # 2784 (Closed): Ability to read multiple works

Add second work to the search URL

07/11/2020 01:24 AM - Luke Murphey

Status:	Closed		**Start date:**	07/10/2020
Priority:	Normal		**Due date:**	
Assignee:	Luke Murphey		**% Done:**	100%
Category:			**Estimated time:**	0.00 hour
Target version:	4.4.0			

Description

History

#1 - 07/11/2020 06:48 AM - Luke Murphey

- **Done** The page is loaded (/work/berean-study-bible/Luke/2/12?parallel=new-testament)
- **Done** A verse is clicked
- **Done** The next/previous chapter buttons are clicked
- **Done** Going back through the history (and second work is dropped when you go back to a URL where the second work is not included)
- **Done** Parallel work is closed (URL argument is dropped)
- **Done** A non-parallel work is chosen

#2 - 07/12/2020 02:10 AM - Luke Murphey

Prob: Going back through the history (and second work is dropped when you go back to a URL where the second work is not included)

Qs:

- How does not avoid this? The URL monitoring is part of state. You are supposed to react to the change of state.
    - https://github.com/airbnb/javascript/issues/1875
- What condition is causing the loops?
    - Is the loading of the second work
    - loadSecondWorkChapter() calls setState
- **[determined]** What is a minimal repro?
    - Load a parallel work, then press back

Obs:

- Adding loading of the second work in componentDidUpdate results in endless calls
- componentDidUpdate() does get called when the URL changes

Solns:

#3 - 07/12/2020 02:17 AM - Luke Murphey

- Status changed from New to Closed

- % Done changed from 0 to 100
