Category:			**Estimated time:**	0.00 hour
Target version:	4.6.2			

Description

History

#1 - 07/12/2020 04:33 AM - Luke Murphey

Repro:

1. Open http://localhost:8081/work/antiquitates-judaicae/1/1?parallel=antiquities-of-the-jews
2. Select abdicatus: note that second work is not closed

Obs:

- The issue a race condition in this call:

  -
    ```
        // Drop the second work since this one is not related
        this.setState({ secondWork: null, secondWorkData: null });
        this.navigateToChapter(work);
    ```

    - navigateToChapter() immediately pops the state and loads the second work all over again

Solns:

- Have navigateToChapter() take the second work
- Convert this to a functional component
  - Would make the race condition less of a problem
