

TextCritical.net - Bug #2883

Search page loses context of the work

02/28/2022 06:02 PM - Luke Murphey

Status:	Closed	Start date:	02/28/2022
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	4.7.1		
Description Repro: 1. Select a work 2. Search a word 3. Click back: note that you go to the start page			
Subtasks: Bug # 2884: Add support for having a second work in the READ_WORK URL Closed Bug # 2885: Organize URL creation such that parameters and base URLs are broken out Closed Bug # 2886: Replace URL creation to use the URLs module consistently Closed			

History

#1 - 02/28/2022 07:57 PM - Luke Murphey

Obs:

- The link is being made to the search from src/components/WordInformation/index.jsx
- Going back to being executed by src/components/Search/index.jsx::onClickBack()
 - This is executing READ_WORK()
- Pushing the example state in <https://github.com/remix-run/history/blob/dev/docs/navigation.md> doesn't work
- BookSidebar correctly uses state; the src/components/WordInformation/index.jsx does not.

Qs:

- Is the issue in that the history is not being made correctly or is it that the search isn't going back correctly?
 - Seems like linkBackURL is not being constructed
- **[No]** Is linkBackURL being set?
 - location.state is null
- **[Yes]** Is state being set properly?
 - <https://github.com/remix-run/history/blob/dev/docs/navigation.md>
- Is location being read properly?
- What do I need to test?

1. Search link to work
2. Reader: work name change
3. Reader: setting of URL
4. Back button on:
 1. About page
 2. Beta code converter
 3. Contact me
