- Subject changed from *Empty verse* to *Some works get imported with empty verses*

This work actually does have verses. The chapter descriptors are referring to the wrong chapters though since multiple seem to match the descriptors.

This work has tree levels: book, chapters, sections. The chapters are marked as readable units for some reason event though they have no content and no verses. Not sure how these are getting marked as readable units.

#3 - 11/22/2012 07:42 AM - Luke Murphey

The issue is with the fact that it has chapters marked as readable units that have no verses.

#4 - 11/22/2012 07:52 AM - Luke Murphey

This work has a number of text nodes. Each is an entirely separate section of text.
