Description

Some words in the database are listed with multiple genders. Consider the following example (ζῳωδεστεροις):

```
{49599819 9 zw|w/dhs    like an animal    masc/neut dat comp pl}
```

The database needs to be updated to allow multiple genders to be associated. 121977 entries are affected (about 8%).

I dropped the related database tables with:

```
drop table reader_worddescription;
drop table reader_worddescription_dialects;
drop table reader_worddescription_cases;
```
