<b>Target version:</b>	1.0.3		
<b>Description</b>			
The logging system causes the UI to become unresponsive when it cannot submit the log messages.			

#### History

##### #1 - 04/08/2010 11:06 PM - Luke Murphey

Need to have log messages handed to a queue thread which then sends them to the log server. Note that this only applies to TCP messages generally.

##### #2 - 11/02/2010 01:13 PM - Luke Murphey

- Category set to Log Management

##### #3 - 01/07/2011 07:12 AM - Luke Murphey

- Assignee set to Luke Murphey

- Target version set to 1.0.3

- Start date deleted (04/08/2010)

##### #4 - 01/22/2011 09:10 AM - Luke Murphey

- % Done changed from 0 to 100

The TCP connection timeout has been set to 5 seconds. After which, NSIA will not attempt to reconnect to the log server for another minute. This means that the user will have to experience up to a 5 second delay every minute at most. Most of the time a background operation will trigger the delay and thus the user will not experience any delay. This is sufficient to close this issue.
