

Django Monitoring - Feature #542

Support multiple applications

02/25/2013 08:00 AM - Luke Murphey

Status:	Closed	Start date:	02/25/2013
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.3.0		

Description

Add the ability to select which application to pull logs from.

This could be done with a fieldset, much like the Exchange app:

```
<fieldset autoRun="true">
  <input type="dropdown" token="host">
    <label>Host Name</label>
    <prefix>host="</prefix>
    <suffix>"</suffix>
    <populatingSearch fieldForLabel="host" fieldForValue="host">
|inputlookup hostInformation.csv
|search HubTransport="True"
|stats count by host
    </populatingSearch>
    <earliestTime>-1m</earliestTime>
    <latestTime>now</latestTime>
  </input>
  <input type="time">
    <default>Last 60 minutes</default>
  </input>
</fieldset>
```

History

#1 - 11/03/2013 05:44 AM - Luke Murphey

- Target version deleted (1.0)

#2 - 12/18/2015 07:26 AM - Luke Murphey

- Status changed from New to Closed

- Target version set to 1.3.0

- % Done changed from 0 to 100
