

ThreatFactor NSIA - Bug #56

HTTP Discovery Scanner Takes Different Paths

04/08/2010 11:34 PM - Luke Murphey

Status:	Rejected	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Scan Engine	Estimated time:	0.00 hour
Target version:			
Description			
The HTTP scanner follows links using different threads. Therefore, the scanner tends to continually find new issues that must be re-baselined since it doesn't always evaluate the same resources.			

History

#1 - 11/02/2010 01:15 PM - Luke Murphey

- Category set to Scan Engine

#2 - 01/07/2011 07:13 AM - Luke Murphey

- Status changed from New to Rejected

- Start date deleted (04/08/2010)

No way to fix this without a large amount of complexity (that is likely to introduce bugs)
