

## TextCritical.net - Feature #585

### Alternative Title Slug Support

03/25/2013 02:48 PM - Luke Murphey

<b>Status:</b>	Closed	<b>Start date:</b>	03/25/2013
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Luke Murphey	<b>% Done:</b>	100%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.8		
<b>Description</b>			
Add a table that allows alternative title slugs to be used for texts. This allows the title_slugs to be modified without breaking existing links.			
<b>Subtasks:</b>			
Task # 586: Dereference work title slugs from shortcuts table			<b>Closed</b>
Task # 587: Adjust URL if a new URL is used			<b>Closed</b>

### History

#### #1 - 03/25/2013 11:29 PM - Luke Murphey

- Status changed from New to In Progress

#### #2 - 03/26/2013 04:28 AM - Luke Murphey

- File *aliases.xlsx* added

#### #3 - 03/26/2013 04:30 AM - Luke Murphey

I populated the table with existing aliases with the following code:

```
from reader.models import Work, WorkAlias

s = """78    orationes-1
462    speeches-1
509    regum-et-imperatorum-apophthegmata-1
511    apophthegmata-laconica-1
512    instituta-laconica-1
513    lacaenarum-apophthegmata-1
515    mulierum-virtutes-1
517    quaestiones-romanae-1
519    quaestiones-graecae-1
521    parallela-minora-1
523    de-fortuna-romanorum-1
525    de-alexandri-magni-fortuna-aut-virtute-1
527    de-gloria-atheniensium-1
677    histories-1"""

items = s.split("\n")

for item in items:
    id, alias = item.split("\t")
    work = Work.objects.get(id=id)
    work_alias = WorkAlias(work=work, title_slug=alias)
    work_alias.save()
```

#4 - 03/26/2013 06:09 AM - Luke Murphey

- Status changed from In Progress to Closed
