This doesn't seem to have anything to do with the scripts but simply with the sheer size of the document. Disabling the scripting didn't help.

#2 - 04/04/2013 04:32 AM - Luke Murphey

- Status changed from New to In Progress

#3 - 04/04/2013 04:33 AM - Luke Murphey

BTW: Perseus renders the document the same way: <http://www.perseus.tufts.edu/hopper/text?doc=Perseus%3atext%3a2008.01.0483>

Perseus' version includes some sort of numbering that I don't have in mine.

#5 - 04/05/2013 04:32 AM - Luke Murphey

- Status changed from In Progress to New

- Target version deleted (0.8)

This may be a memory issue. My site takes 22 MB to render Aratus' Phaenomena; Perseus takes about 8.2 MB. Ad Ammaeum takes 6.5 MB.
