Target version:	0.8		
Description			
<ul style="list-style-type: none">• Against Apion• The Life of Flavius Josephus• The Wars of the Jews• Antiquities of the Jews			

Associated revisions

Revision 458 - 04/03/2013 06:24 AM - Luke Murphey

Fixed importation of Josephus' English works. Closes #591.

Revision 458 - 04/03/2013 06:24 AM - Luke Murphey

Fixed importation of Josephus' English works. Closes #591.

Revision 447 - 04/03/2013 06:24 AM - Luke Murphey

Fixed importation of Josephus' English works. Closes #591.

History

#1 - 04/03/2013 04:03 AM - Luke Murphey

You can delete existing works with this:

```
from reader.models import Work
Work.objects.filter(language="English", authors__name="Flavius Josephus").delete()
```

#2 - 04/03/2013 06:35 AM - Luke Murphey

I created the connections between the works of Josephus in Greek and English with the following code:

```
from reader.models import Work, RelatedWork
ap_eng = Work.objects.get(title_slug="against-apion")
ap_grk = Work.objects.get(title_slug="contra-apionem")
if RelatedWork.are_divisions_identical(ap_eng, ap_grk):
    RelatedWork.make_related_work(ap_eng, ap_grk)

an_grk = Work.objects.get(title_slug="antiquitates-judaicae")
an_eng = Work.objects.get(title_slug="antiquities-of-the-jews")
if RelatedWork.are_divisions_identical(an_grk, an_eng):
    RelatedWork.make_related_work(an_grk, an_eng)

jv_grk = Work.objects.get(title_slug="the-life-of-flavius-josephus")
jv_eng = Work.objects.get(title_slug="josephi-vita")
```

```
if RelatedWork.are_divisions_identical(jv_grk, jv_eng):
    RelatedWork.make_related_work(jv_grk, jv_eng)

wars_grk = Work.objects.get(title_slug="de-bello-judaico-libri-vii")
wars_eng = Work.objects.get(title_slug="the-wars-of-the-jews")
if RelatedWork.are_divisions_identical(wars_grk, wars_eng):
    RelatedWork.make_related_work(wars_grk, wars_eng)
```

Applied in changeset [r458](#).

#4 - 04/03/2013 03:12 PM - Luke Murphey

- Status changed from Closed to In Progress

- % Done changed from 100 to 50

#5 - 04/03/2013 03:34 PM - Luke Murphey

Existing indexes were deleted with the following:

```
from reader.contentsearch import WorkIndexer
from whoosh.qparser import QueryParser
```

```
inx = WorkIndexer.get_index()
parser = QueryParser("content", inx.schema)
inx.delete_by_query(parser.parse(u'
work:antiquities-of-the-jews OR work:against-apion OR work:the-life-of-flavius-josephus OR work:the-wars-of-th
e-jews'))
writer = inx.writer()
writer.commit(optimize=True)
```

#6 - 04/03/2013 04:13 PM - Luke Murphey

Indexes were rebuilt using:

```
from reader.models import Work
from reader.contentsearch import WorkIndexer
```

```
works = Work.objects.filter(language="English", authors__name="Flavius Josephus")
for work in works:
    WorkIndexer.index_work(work)
```
