Saving the work with Sigil and then converting it via KindleGen causes the breaks work. Not sure why. On the other hand, the Kindle Previewer doesn't render the work on the previewer with Kindle Paperwhite.

#3 - 09/24/2013 06:17 AM - Luke Murphey

The problem was that the type of the resource was not specified on the stylesheet links (type="text/css").

#4 - 09/24/2013 06:18 AM - Luke Murphey

The fact that the Paperwhite rendering fails may be due to font inclusion: <http://www.woodislandsprints.com/?p=591>

#5 - 09/24/2013 06:43 AM - Luke Murphey

Removing the bootstrap CSS file allows Paperwhite rendering to work.

- % Done changed from 0 to 80

#7 - 09/24/2013 04:13 PM - Luke Murphey

I think I am going to remove bootstrap from the epub.

Here are works that are good ones to use for verifying that the content seems to still render correctly:

- Agammenon
- New Testament
- Antiquities of the Jews

- Status changed from New to Closed

- % Done changed from 80 to 100
