Pivot has uses responsive bootstrap code to hide the header. I would like to get a similar effect.

Here is a snippet:

```
.shared-responsiveheaderpage header {  
position: absolute;  
top: -59px;  
right: 0px;  
left: 0px;  
height: 65px;  
}
```

There is a tab that is used to hide/show the header:

```
<div class="expand-collapse-control" style="background-color: rgb(76, 78, 83);">  
  <a href="#" class="tab"><i class="icon-menu"></i></a>  
</div>
```
