ThreatFactor NSIA - Feature #81

Optimize HTTP Client

04/09/2010 12:05 AM - Luke Murphey

Status:	New		**Start date:**	04/09/2010
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Scan Engine		**Estimated time:**	0.00 hour
Target version:				

Description

Need to review the configure of the HTTP client to determine if it appropriate.

Additional Information: http://jakarta.apache.org/httpcomponents/httpclient-3.x/preference-api.html

History

#1 - 04/09/2010 12:05 AM - Luke Murphey

The following parameters have the most relevance:

- **http.protocol.warn-extra-input** (generates a log warning when more bytes are returned than the content-length)
- **http.protocol.status-line-garbage-limit** (maximum number of ignorable lines before we expect a HTTP response's status code)
- **http.method.retry-handler** (changes how many retries are performed after a recoverable HTTP exception occurs)
- **http.socket.timeout** (determines how long a timeout should be thrown)
- **http.useragent**
