

ThreatFactor NSIA - Feature #84

Display Finding Content From ThreatPatterns

04/09/2010 12:08 AM - Luke Murphey

Status:	New	Start date:	04/09/2010
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Scan Engine	Estimated time:	0.00 hour
Target version:			
Description			
Display the content that matched the threat pattern signature in the scan report. This makes it easy to identify the actual content that tripped the rule.			

History

#1 - 04/09/2010 12:09 AM - Luke Murphey

For this to work NSIA needs to do the following:

- Store the start and offsets of the finding
- Store the conten that was scanned
- Provide a view to display the finding (something like a cross between a hex editor interface and a graphical diff)

Note that ThreatScript definitions don't currently report the start and end of the finding.
