Feedparser isn't accepting the auth headers for some reason.

This works:

```
auth = SyndicationModularInput.get_auth_handler("http://127.0.0.1:8888/rss_example.xml", username="admin", password="changeme")

opener = urllib2.build_opener(auth)
resp = opener.open('http://127.0.0.1:8888/rss_example.xml')

self.assertEqual(resp.code, 200)
```

But this does not:

```
auth = SyndicationModularInput.get_auth_handler("http://127.0.0.1:8888/rss_example.xml", username="admin", password="changeme")

d = feedparser.parse('http://127.0.0.1:8888/rss_example.xml', handlers=[auth])

self.assertEqual(d['status'], 200)
```

#2 - 02/25/2015 03:15 AM - Luke Murphey

Removing the http_error_401 function from _FeedURLHandler seems to resolve the problem. Not sure why yet.
