

## Slideshow - Task #982

### Use an iframe to host slideshow

<b>Target version:</b>	2.2		
<b>Description</b>			
Consider using an iframe to host the show content. This would have several advantages, including:			
<ul style="list-style-type: none"><li>• Ability to use the same window to host the show</li><li>• Ability to hide all content until the hide-chrome and inverted stylesheets are loaded</li></ul>			
<b>Subtasks:</b>			
Task # 993: Handle resizing			<b>Closed</b>
Task # 994: Don't show overlay when not inverting colors			<b>Closed</b>
Task # 995: Test on FireFox, IE, and Safari			<b>Closed</b>
Task # 996: Hide redundant scrollbars			<b>Closed</b>
Bug # 997: Overlay controls do not reliably appear/disappear			<b>Closed</b>
Task # 998: End show when escape is pressed			<b>Rejected</b>
Task # 999: Consider replacing the stop show iframe with a dialog in the main view			<b>Closed</b>

### History

#### #1 - 02/28/2015 04:31 AM - Luke Murphey

See <http://stackoverflow.com/questions/19498725/control-iframe-content-with-javascript-html>

#### #2 - 03/25/2015 12:59 AM - Luke Murphey

It looks like sending some arguments to the dashboard will hide the items natively too:

```
?hideEdit=true&hideTitle=true&hideSplunkBar=true&hideAppBar=true&hideFooter=true&targetTop=true
```

#### #3 - 04/16/2015 05:09 AM - Luke Murphey

Some other things I need to do to get this to work:

1. Show a "stop show" button on mousemove
2. Don't show dark colored overlay when dark mode isn't used
3. Deal with scrollbars
4. Deal with view size changes

#### #4 - 04/16/2015 05:10 AM - Luke Murphey

Might want to not stop the show but put it in a smaller window when the view is clicked.

#### #5 - 04/16/2015 10:52 PM - Luke Murphey

Stop show button works; but need to figure out a better solution that waiting two seconds to wire it up.
