It looks like the problem is that the "get_all_link_group_annotation" macro doesn't work correctly when the to_device is empty.

#2 - 03/31/2015 06:20 AM - Luke Murphey

Repro search:

```
`get_all_link_group_annotation(13, 0, 19.8e.06, )`
```

The report search is:

```
| stats count | eval command="13" | eval command=if(substr(command,1,1)=="0", substr(command,2,1), command) |
eval all_link_group="0" | eval from_device="19.8e.06" | eval to_device="" | lookup all_link_annotations comman
d all_link_group from_device to_device OUTPUTNEW annotation | fields command all_link_group from_device to_dev
ice annotation
```

Removing the lookup on to_device makes this work.

#3 - 03/31/2015 10:44 PM - Luke Murphey

I'm not sure why this search succeeds:

```
sourcetype=insteon_plm from="19.8e.06" `get_command_info` `lookup_all_link_group_annotation(command,from,to)
` `lookup_all_link_group_annotation(command,from)`| table _time status from to command options | s
ort -_time
```

#4 - 03/31/2015 11:01 PM - Luke Murphey

This does work:

```
| stats count | eval to="" | eval from="19.8e.06" | eval all_link_group="0" | eval cmdl=11 `lookup_all_link_g  
roup_annotation(command,from,to)` `lookup_all_link_group_annotation(command,from)`| table _time status from  
to command options
```

#5 - 03/31/2015 11:12 PM - Luke Murphey
